

World Microarray Congress 2006

March 24-25, 2006
Vancouver, Canada

Early Bird Registration rates end January 10, 2006

World Microarray Congress 2006, which takes place March 24 and 25 at the Westin Bayshore Resort and Marina, will provide an opportunity for researchers and industry leaders from all over the world to come together to share their expertise, exchange ideas and promote education about the diverse field of microarray technology.

This international conference brings together both users and providers of microarray technology to discuss the latest research findings and technical advancements, as well as future applications, of both **DNA** and **protein** microarrays.

Leading authorities from academia, as well as biotech and pharma industries will be speaking at the conference and we anticipate **400 international participants**, most of whom are either scientists currently working with microarray technologies, or directors and executives from corporations. As well, there will be many **prominent companies** at the **exhibition** to demonstrate the latest technological advances.

There will also be a collection of **poster presentations** on display which congress participants will be able to browse between sessions.

World Microarray Congress 2005 was a great success, the feedback from participants was very positive. The 2005 congress was attended by representatives from 10 countries in North America, Europe and Asia.
