

Fourth annual HUPO Antibody Initiative (HAI) workshop, Sunday, Oct 7, 8.00-10.30 AM, room 335 in the Janbogo Hall at the Seoul Convention Center.

The workshop will focus on the progress and time plans for the effort to create a database portal for antibodies to the human proteins and to compile a community-based virtual resource (catalogue) of quality assured antibodies available to the scientific community. A pilot database portal will be presented and the format and deliverables for the future will be discussed. The workshop also aims to allow input on content requirements and rules for inclusion and exclusion of data as well as the parameters for submissions of data by academic and commercial antibody providers. The participation in the workshop is free of charge but all participants should register by email before October 1 to Sylvie Ouellette (email: [sylvie.ouellette@mcgill.ca](mailto:sylvie.ouellette@mcgill.ca)).

Co-Chairs: Mathias Uhlen, Michael Snyder, Peter Hudson

### **Preliminary agenda**

- 8.00 Welcome and introduction (Uhlen, Snyder, Hudson)
- 8.20 Status EU ProteomeBinders (Taussig, UK)
- 8.30 NCI affinity reagents and NIH road map (Clarke, US)
- 8.40 Proteome standards initiative - PSI (Hermjakob, UK)
- 8.50 Presentation of a pilot database (Bjorling, Sweden)
- 9.00 **Panel** discussion
  - \* Database format
  - \* Database content
  - \* Submission rules and criteria
  - \* Validation criteria (choose of applications)
  - \* Scoring of antibodies (rules)
  - \* Time plans and deliverables
