## HUMAN IMMUNO-PEPTIDOME PROJECT

**Mission:** HIPP started in 2015 as a HUPO initiative. The long-term goal of HIPP is to make the robust analysis of immunopeptidomes accessible to any immunologist, clinical-investigator and other researchers to increase the impact of immunopeptidomics in immunology, vaccine and immunotherapy on a global scale.

## MEMBERSHIP

By becoming a member of HUPO-HIPP,

I confirm my interest in participating to activities organized by HUPO-HIPP and I wish to receive any new information regarding the development of the initiative.
