HPP CLINICAL SCIENTIST TRAVEL GRANT APPLICATION 2017

The Human Proteome Project (HPP) was established by the Human Proteome Organization (HUPO) to explore the human proteome and to enable the routine, reliable and broad application of state-of the-art measurements of proteins and proteomes by life scientists studying the molecular mechanisms of biological processes and human disease[1]. This will be accomplished through the generation of laboratory and informational resources that support both research and routine measurement of the process- or disease relevant proteins[2].

To accomplish these goals, the HPP is reaching out to clinical scientists or clinicians who are using or consider using proteomics for their research projects[3]. HPP is supporting **five (5)** clinical scientists with a travel grant to attend the 2017 HUPO World Congress in Dublin, Ireland that will take place from September 17-21, 2017.

Travel grant recipients will receive USD $1,000 to offset travel and hotel costs in addition to complimentary congress registration. The recipients are expected to actively participate in the HUPO congress and will be required to join a round table discussion. The goal of the discussion is to gain insight and feedback beyond proteomics. Further information on the HUPO 2017 congress and HPP activities in Dublin can be found at http://hupo2017.ie/.

[3] The review committee will consider an application submitted by any clinical scientist or clinician who is or is considering using proteomics for their research including PhD-level scientist who are conducting clinical research.

APPLICATION PROCESS

1. Complete this form.
2. Write a brief description of your area of research, its relation to proteomics and the HPP, and detailed plans of how you will enhance your research with proteomics technologies (two pages maximum).
3. Submit the form and description as one document via email to office@hupo.org by Friday, June 30, 2017.

APPLICATION DEADLINE: Friday, June 30, 2017. Winners will be notified by July 14, 2017.
